Introducing New Salon & Spa Services!

Matura Salon & Spa Management is pleased to bring exciting, new salon and spa services to residents! The creative and talented team at Matura possesses a genuine passion for helping people look their best while improving overall well being.

“Caring for the dignity of older adults is an essential part of our mission,” states Cathy Cox, Matura Field Manager, who will be overseeing the salon program at Mosser Nursing Home. “Those with dementia especially deserve our careful attention, patience and respect. The gentle, caring touch from a stylist or manicurist, who is especially trained in caring for older adults with dementia, can evoke feelings of intimacy and empathy, which fosters a deep connection between client and caregiver.”

Matura professionals are licensed and skilled cosmetologists, nail technicians, massage therapists and estheticians extensively experienced in hair cutting and design, color, manicure, facial, hair removal and massage therapy services.

Matura team members are additionally certified in the Alzheimer’s Association® essentiALZ™ CARES Dementia Program with demonstrated learning of quality dementia care practices and a basic understanding of Alzheimer’s and other related diseases.

All salon and spa services will be available now by appointment offering residents both convenience and relaxation for a most enjoyable salon visit. Residents and family members are welcome to visit the Salon and meet our new staff.

Family members are encouraged to share photos of their loved ones and communicate their concerns regularly with our team of salon experts so that together, we can help to maintain a sense of their loved one’s identity.
